Subject:—Import of unmanufactured tobacco into India—Certificate of freedom from **Ephestia Elutella**.

Sir.

No. F. 7-16—46—P. P. S. I am directed to refer to the correspondence undermentioned regarding conditions under which imports of unmanufactured tobacco into India are permited. Under rule 8-B of the late Department of Education, Health and Lands Notification No. 520—35-A, dated the 20th July 1936, unmanufactured tobacco either raw or cured cannot be imported into India unless accompanied by (i) a general certificate of freedom from injurious insects and diseases and (ii) a special certificate of freedom from **Ephestia Elutella**, issued by a competent authority in the country of origin. In the case of imports from the United States of America, the Government of India however, agreed to accept the standard export certificate issued by the American Department of Agriculture with a qualifying notation to the effect "No **Ephestia Elutella** has been found". It has, however, been brought to the notice of the Government of India that consignments of tobacco have, of late, been found to be accompanied by fumigation certificates issued by private industrial concerns of the country of origin. In view of the risk involved in accepting such certificates, the Government of India would like to invite attention of all Provincial Governments, etc. that tobacco imported into India should invariably be accompanied by the requisite documents, as required under the existing orders, failing which the consignment are liable to be refused entry or destroyed. Fumigation certificate issued by private industrial concerns will not be accepted. I am, therefore, to request that wide publicity may be given to the orders regarding the conditions under which import of tobacco is permitted and the importers concerned advised to adhere to them.
